WITHIN: 1/4 OF 1/4 SECTION, T17S, R29E, MDB&M.

INSTRUCTIONS: Please complete Items A, B and C. Item D should be completed if you replaced all or part of your regular water supply with reclaimed or polluted water. RETURN THIS FORM BY JULY 1, 1993. (Additional information on reverse side of this form.)

A. Amount of Use - Fill in the amount of water used each month. If monthly and annual use are not known, check the months in which water was used.

Amounts below are: ☐ Gallons  
☐ Acre-feet  
☒ GPM (other)

|      | Jan. | Feb. | Mar. | Apr. | May | June | July | Aug. | Sept. | Oct. | Nov. | Dec. | Total Annual |
|------|------|------|------|------|-----|------|------|------|-------|------|------|------|--------------|
| 1990 | X    | X    | X    | X    | X   | X    | X    | X    | X     | X    | X    | X    | 1.5          |
| 1991 | X    | X    | X    | X    | X   | X    | X    | X    | X     | X    | X    | X    | 1.5          |
| 1992 | X    | X    | X    | X    | X   | X    | X    | X    | X     | X    | X    | X    | 1.5          |

B. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation \_\_\_\_\_

Stockwatering \_\_\_\_\_

Domestic \_\_\_\_\_

Other (specify) Used by livestock and wildlife

C. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

None

D. If part of the water listed in Part A consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below.

# MEMORANDUM

**TO:** Statements of Water Diversion and Use filed by US Bureau of Land Management

  
**FROM:** Whalen Toy  
Data Management Unit

**DATE:** February 16, 2007

**SUBJECT:** UPDATING WRIMS WRSOUR-POD SCREENS FOR DIVERSIONS  
SHOWN ON LAWEAH (15 minute)/CASE MOUNTAIN (7.5 minute) USGS  
QUADRANGLES

During the February 13, 2007 meeting with the contractors whom were developing the new GIS system for ewrims, the topic of whether or not there were section numbers designated by USGS were greater than 36 was raised. I commented to the group that the USGS has designation sections to be greater than 36 on various quadrangles throughout the State. However, I could not be specific on which USGS maps had those larger numbered sections.

To verify my comments, I ran a WRIMS sort on February 15<sup>th</sup> and retrieve three records having sections greater than 36. I further verified that two of the filings were in projected sections and they turned out to be within the 1 to 36 ranges. However, I did find one was properly designated on the same Kaweah 15 minute Quadrangle (Note that the 7.5 minute being the Case Mountain, CA provisional edit 1983 USGS Quadrangle). I also found that about dozen and a half other Statements of Water Diversions and Use (Statement) were plotted in sections ranging from 37 to 46 on the same Kaweah 15 minute Quadrangle. For these other Statements, the sections in WRIMS were not reflective of what USGS was showing.

Since the current WRIMS entry convention for named sources and sections was to be reflective with the current USGS quadrangles, on February 16<sup>th</sup>, I made a proposal to the Jim Kassel, Assistant Division Chief, that if the diversions sites for these Statements were properly plotted, then WRIMS needs to be corrected. Mr. Kassel concurs to correcting the public land survey description wherever necessary in WRIMS to agree with the USGS Quadrangles.

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"  
"Information Pertaining to Water Rights in California"  
"Water Rights for Stockponds Constructed Prior to 1969"  
"Appropriation of Water in California"
